

Electronics room safety quiz

Started: Sep 10 at 3:32pm

Quiz Instructions

You must pass this quiz with a 80% score in two attempts. A few questions do have more than one correct answer, ensure you select all correct answers. If you fail to pass the quiz (with a 80%), you will need to email [SDELc@mst.edu \(mailto:sdelc@mst.edu\)](mailto:sdelc@mst.edu) in order to have your class reset.

Good Luck.

Question 1 1 pts

You should plug in all 120v equipment into the benches so you can easily reset the breaker if the breaker were to be tripped.

True

False

Question 2 1 pts

It's okay to leave store-bought batteries alone while charging.

True

False

Question 3 1 pts

When disposing of batteries what should you do before laying the battery in the sand bucket?

Tape the terminals with electrical tape so they can't be shorted out.

Turn on all the power benches in the E-Lab.

Order a new one immediately off Amazon.

Tell operations manager the battery is dead.

Question 4 1 pts

If you're leaving a project out, you need to tidy up as much as possible and leave a note with your name and contact details.

True

False

Question 5 1 pts

If there are people in the machine shop, you can be alone in the E-Lab.

True

False

Question 6 1 pts

Which of these do you need to do before leaving the E-Lab unattended?

All of these answers.

Make sure no batteries are charging.

Turn off all table power switches and vent fan.

Close all cabinets and put away all tools and parts.

Question 7 1 pts

Because of the lead based solder used, you should not bring food or drink into the E-Lab.

True

False

Question 8 1 pts

You should NEVER spot weld across opposite terminals of a battery, stay to one side.

True

False

Question 9 1 pts

Where should any batteries in the E-Lab be stored?

Let the solar car team deal with them.

☐

In the sand buckets.

☒

Any brown cabinet.

☐

Yellow, flame retardant cabinet.

Question 10 1 pts

What precautions should be taken when using a soldering iron?

☐

Activate the ventilation system.

☐

Wear long pants to help prevent burns.

☐

Check that all cables and iron are functioning correctly.

☒

All of these answers.

Question 11 1 pts

If you are unsure or don't know how to use some equipment in the electronics lab, you should ask someone instead of experimenting.

☒

True

☐

False

Question 12 1 pts

Which of the following is a valid concern when working in the E-Lab?

☐

Electric Shock

☐

Burns

☐

Lead Contamination

☒

All of these answers.

Question 13 1 pts

Scrap copper wire should go in the blue recycling bin in the corner.

☒

True

False

Question 14 1 pts

When using a spot welder, you should be extra cautious with regard to placement of the electrodes and your foot around the foot pedal.

True

False

Question 15 1 pts

The refrigerator in the E-Lab should be used for storing chemicals that need a cold environment.

True

False

Question 16 1 pts

You should turn on the ventilation fan when soldering to remove the fumes.

True

False

Question 17 1 pts

The microscope has a bottom collar to catch it in case the top collar fails. If you plan on unlocking the top collar and moving the microscope, you MUST make sure the bottom collar is locked and in a position where the microscope could not fall and contact the table.

True

False

Question 18 1 pts

When you finish with a heat gun, you should turn off or turn down the heat and keep the fan on, cooling down the coils and preventing the gun from melting itself.

True

False

Question 19 1 pts

There is a gallon of heavy metals soap in the kitchen that you should use after working in the E-Lab.

☐

True

☒

False

Question 20 1 pts

If there is an acid/chemical spill in the E-Lab, you should use the acid spill kit in the green bucket with the yellow top to safely clean the spill.

☒

True

☐

False

Question 21 1 pts

If a power supply is not outputting power, a common mistake is forgetting to press a button that enables output.

☒

True

☐

False

Question 22 1 pts

The door to the E-Lab should be kept closed at all times because the room is positively pressured, which keeps particles in the shop from entering.

☒

True

☐

False
